

# STREAMING EVENTS ANYWHERE!

## Broadcast Solution for Internet-Challenged Places

No more relying on wi-fi, or cell service to stream a broadcast! The LU800 multi-camera solution ensures the highest reliability and resiliency, leveraging *IP bonding* of up to 14 connections (cellular, LAN and WiFi) with up to eight 4G/5G internal dual SIM modems, supported by high-efficiency internal antennas. In challenging cellular areas, extra reliability can be attained using an external antenna connection. Essentially, it's a powerful, *no-fail* portable hotspot!
